# The DieQua Advantage - Motion Products & Services

DieQua Corporation is a manufacturer and supplier of Power Transmission and Motion Control components. Specializing in gear and drive products, we offer an extensive range of engineered solutions to a wide variety of industries. From precision motion control to highly reliable constant and variable speed applications, DieQua has the products and technical know how to meet your needs. Along with our world renown manufacturing partners, DieQua Corporation is dedicated to providing you with superior performance, outstanding customer service, maximum design versatility, and worldwide support.

## Sales

DieQua Corporation has established a network of direct sales associates, manufacturer's representatives, and distributors to provide personal service to our valued customers.

## Customer Service

DieQua Corporation is dedicated to being your most valuable supplier. From technical support to on time delivery, you can count on DieQua to be a reliable extension of your design team.

## Engineering Support

DieQua Corporation has several decades of combined experience specifying power transmission and motion control components. This assures the proper selection of components and systems for your unique requirements.

## Manufacturing

DieQua Corporation now manufactures or assembles most of the products we provide. This adds valuable flexibility to provide on time delivery of standard orders as well as prototypes.

## Special Designs

DieQua Corporation welcomes the opportunity to provide component modifications or complete special designs. These capabilities compliment our philosophy of offering the best solution available.

## Repair Services

DieQua Corporation can repair most products we supply. We maintain a large parts inventory and factory trained technicians to assure timely turnaround.
