

VARVEL[®]
MOTION CONTROL SINCE 1955

technology made in Italy

RD

* VS made in China

Technology Made in Italy

Since 1955 Varvel has been making speed reducers and variators for light industry applications. Reliable partner in power transmission equipment offers also customized solutions always according to a socially responsible company values. Modularity and flexibility lead Varvel products by a unique kit form, common to all gearbox series. This feature allows distributors an easier job to set up required products in few minutes.

Helical Gearboxes

RD

Helical Gearboxes RD

PRODUCT DESCRIPTION

Housing & Covers
Aluminium die cast (5 sizes)
Cast iron (2 sizes)

Gearing
20MnCr5 alloy steel
Case hardened
Profile ground or shaved

Bearings
Ball or roller types
according to sizes
and technical requirements

Multipurpose housing
Foot & Foot/Flange Mountings
One housing for 2- & 3-stages

Lubrication
Synthetic long-life oil Grade ISO VG 320
No oil plugs
In-house filling

Input
NEMA and IEC
motor adapters and
Universal elastic coupling

Oil seals
Nitrile Butadiene Rubber -NBR
as standard;
Viton and Silicon on request

Output
Solid shafts
imperial and metric

Helical Gearboxes RD

PRODUCT DESCRIPTION

The helical gearboxes Series RD feature a one-piece cast housing complete with inner support to accommodate 2 or 3 gear stages into the same casing. Manufactured to latest ISO engineering design specifications the housing is checked by computer-aided structural analysis for deflection and stress distribution.

Significant strains caused by the effects of torque and external loads do not deflect the monolithic ribwork of the housing, which significantly improves the integrity of the sealed surfaces.

The helical gearboxes, Series RD are manufactured in B3 base mounted configuration; they can be easily converted to B5 flange mounting by fitting of the appropriate additional adaptor flange onto the footed body.

Single-setup machining on state-of-the-art CNC production lines, the most recent calculation techniques and process controls give superior operational reliability, maximum output torques, high overhung and thrust load capacity, and long working life-time.

SYMBOLS & FORMULAS

D	[in]	Transmission element PCD	
F _r	[lb]	Application overhung load (OHL)	
F _{r1}	[lb]	Catalogue input overhung load (input OHL)	
F _{r2}	[lb]	Catalogue output overhung load (output OHL)	
F _{r2b(x)}	[lb]	Permissible OHL at position 'X' on output shaft, bearing lifetime condition	
F _{r2s(x)}	[lb]	Permissible OHL same as F _{r2b(x)} , shaft bending and torsional stress condition	
SF		Service factor	$FS = \frac{M_2}{M_{(app)}}$
i _n		Nominal reduction ratio	
i _r		Actual reduction ratio	
J ₁	[ft ² -lb]	Gearbox moment of inertia at input shaft	
J ₂	[ft ² -lb]	Application moment of inertia	
J _m	[ft ² -lb]	Motor moment of inertia	
k _(a)		Mass acceleration factor	
k _(t)		Transmission element factor	
Lub H/V	[pt]	Lubricant [pt]: H = horizontal mounting / V = vertical mounting	
M ₂	[in-lb]	Gearbox maximum output torque	$M_2 = \frac{1800 * P_1 * \eta}{n_2}$
M _(app)	[in-lb]	Application torque	
n ₁	[RPM]	Input speed	
n ₂	[RPM]	Output speed	
P ₁	[HP]	Input power @ 60Hz	$P_1 = \frac{M_2 * n_2}{1800 * \eta}$
W	[lb]	Weight: mounting B3-H & average reduction ratio	
η		Efficiency: 0.96 - 2-stage units 0.94 - 3-stage units

Helical Gearboxes RD

MODULAR SYSTEM

Helical Gearboxes RD

ELASTIC COUPLING "G"

Reducer half-coupling

- Material: steel alloy 20MnCr5
- Input shaft built-in
- Two bearing set
- Unchanged casing dimensions

Spider

- External tooth connection
- Material: Thermoplastic Elastomer
- Elastollan[®] TPU - Polyurethane
- Hytrel[®] TPE - Polyester
- Hardness
 - TPU 98 Shore A
 - TPE 72 Shore D
- Temperature
 - TPU -4 / +167 °F (-20/+75 °C)
 - TPE -22 / +212 °F (-30/+100 °C)

Motor half-coupling

- Material:
 - Aluminium die cast (G3, G5, G6)
 - Alloy steel 36SMnPb14 (GS8)
 - Alloy steel C43 on demand (GS3, GS5, GS6)
- Dynamic balancing
- Fitting:
 - Clamp (G3, G5, G6)
 - Key (GS3, GS5, GS6, GS8)
- Bores:
 - NEMA C / TC
 - IEC 72 / N42948

Advantages:

- One gearbox only for each reduction ratio
- Greater flexibility
- Increased stock rotation
- Fretting corrosion elimination between key and keyway
- Zero backlash in gearbox/motor connection
- Allowed angular misalignment 1° max
- High torsional rigidity
- High vibration damping

Input flanges:

- Material:
 - Aluminium up to IEC112 and NEMA 180TC
 - Cast iron from IEC 132 and NEMA 210TC

Helical Gearboxes RD

Helical Gearboxes RD

ELECTRONIC CATALOGUE - 3D-MODELS - 2D-DRAWINGS

Modularity and flexibility have been leading the design of Varvel products since 2000. The gearbox-kit concept was carried out allowing anyone to assemble the unit in a few minutes with standard tooling.

This feature provides the highest flexibility to Varvel's distributors and resellers who - thanks to a limited kit selection - are able to immediately configure the required product.

VARSIZE® selection programme, available from our site

www.varvel.com

allows a friendly sizing of Varvel product range.

2D/3D Drawings

A guided selection allows 2D/3D models to be downloaded for the most popular CAD systems.

Guided selection

This service returns a list of applicable product configurations upon a given sequence of application parameters (power, output torque, rpm, service factor etc.); a PDF data sheet featuring performance data and dimensional drawings is generated for each configuration, as well as the 3D model and 2D drawings.

Helical Gearboxes RD

Example: FRD32/B3-H4 31.5 N56 AU35

SERVICE FACTORS

SERVICE FACTOR of the gearbox

Service factor SF1.0 is meant as typical of 8 hours/day operation, with uniform load, starts/ stops lower than 60 per hour and ambient temperature between 60 and 95 °F.

The ratio between gearbox maximum output torque M_2 of each reduction ratio - listed in gearbox RD ratings, pages 10 to 16 - and application torque $M_{(app)}$ states the service factor to be bigger than the Application factors listed below.

Application	Load duration (hrs/day)			Application	Load duration (hrs/day)		
	< 3	3 - 10	> 10		< 3	3 - 10	> 10

This application guide is given by way of an example and therefore, may not include all the possible cases.

Should the application not be referable to any of the listed cases, the table below gives two service factors - one referred to both load type and work duration, and another one to starts and stops number of the duty cycle - of which the product is the gearbox oversizing coefficient in order to have a torque good enough to perform the required work.

Application: Conveyor 1000 in-lb @ 84 RPM - uniform load - 24 hrs/day → $F_1 = 1.4$; 60 start/stops per hour → $F_2 = 1.0$;

Required torque $1000 \times 1.4 \times 1.0 = 1400$ in-lb

Gearbox to select FRD22 1/20 (84 RPM) 1683 in-lb (gearbox service factor $SF_{1.7} = 1683$ in-lb : 1000 in-lb)

SERVICE FACTOR

$$SF = F_1 \times F_2$$

F_1 = Load & time factor
 a = Uniform load
 b = Variable load
 c = Shock load
 F_2 = Running factor
 d = Start/stops per hour

	F_1	a	b	c	F_2	d
	3 - 4 hrs	0.8	1.0	1.5	6	0.8
	8 - 10 hrs	1.0	1.2	1.8	60	1.0
	10 - 24 hrs	1.4	1.6	2.0	120	1.2

Helical Gearboxes RD

EXTERNAL LOADS

OHL - OVERHUNG LOADS - OUTPUT [lb]

Overhung (radial) loads have to be checked with the rating factor F_{r2} given in the selection tables.

Each transmission element fitted on the gearbox output shaft gives its own transmission element factor $k_{(t)}$ according to the following table.

- Application OHL

$k_{(t)}$	Transmission Element	
1.15	Gear	- Tooth No. < 17
1.40	Chain sprocket	- Tooth No. < 13
1.25	Chain sprocket	- Tooth No. < 20
1.00	Chain sprocket	- Tooth No. > 20
2.50	V-belt pulley	
1.25	Toothed belt pulley	

$$F_r = \frac{2 * M_2}{D} * k_{(t)}$$

- Catalogue OHL at mid shaft $F_{r2} \geq F_r$ Catalogue value to be greater than application OHL

RD	0	1	2	3	4	5	6
a [inch]	0.69	0.79	0.98	1.18	1.38	1.57	1.97
a [mm]	17.5	20	25	30	35	40	50

- OHL offset from gearbox centre * or ** values as appropriate to be greater than application OHL

$$F_{r2b(x)} \geq F_r$$

$$F_{r2b(x)} = F_{r2} * \frac{c}{x + b}$$

$$F_{r2s(x)} \geq F_r$$

$$F_{r2s(x)} = F_{r2} * \frac{a}{x}$$

RD	0	1	2	3	4	5	6
a [inch]	0.69	0.79	0.98	1.18	1.38	1.57	1.97
b [inch]	0.61	0.91	0.94	1.06	1.22	1.46	1.54
c [inch]	1.30	1.69	1.93	2.24	2.60	3.03	3.50

AXIAL LOADS - OUTPUT

Axial load values are assumed to be 20% of OHL, either on tensile and compressive stress, besides OHL itself.

$$F_{a2} = F_{r2} * 0.2$$

SUMMARY OF OPERATION AND MAINTENANCE INSTRUCTIONS

Variable speed and reduction gearboxes are not part of the field of application of the Machinery Directive, art.1(2), and they must not be put into service until the machinery into which they are to be incorporated, has been declared in conformity with the provision of art. 4(2), annex II(B) of Machinery Directives 98/37/CEE/22.6.98 and for Italy only, of DL 459/24.7.96.

Installation

Check if the unit to be installed, is properly selected to perform the required function and that its mounting position complies with the order.

The nameplate reports such information.

Check mounting stability to ensure the unit runs without vibrations or overloads.

Running

The unit may be connected for clockwise or counter-clockwise rotation.

The unit must be stopped as soon as defective running or unexpected noise occur, remove the faulty part or return the unit to the factory for checking.

If the faulty part is not replaced, other parts can also be affected, causing more severe damage and making the identification of initial cause more difficult.

Maintenance

Although the units are no-load run tested in the factory before despatch, it is recommended not to run them at maximum load for the first 20-30 running hours to allow the proper running in.

The gearboxes are delivered already filled with long-life synthetic oil and, in case of replacement or topping, do not mix with mineral lubricants.

Handling

When hoisting, use relevant housing locations or eyebolts if provided, or foot or flange holes.

Never hoist on any moving part.

Painting

Carefully protect oil seals, coupling faces and shafts when units are re-painted.

Long-term storage

For storage longer than 3 months, apply antioxidants onto shafts and machined surfaces, and protective grease on oil seal lips.

Product's Environmental Management

In conformity with Environmental Certification ISO 14001, we recommend the following to dispose of our products:

- scraped components of the units to be delivered to authorized centres for metal object collection;
- oils and lubricants drained from the units to be delivered to Exhausted Oil Unions;
- packages (pallets, carton boxes, paper, plastic, etc.) to lead into regeneration/recycling circuits as far as possible, by delivering separate waste classes to authorized companies.

(complete manual on www.varvel.com)

A socially responsible company _____

To the scope of intensifying our commitment to society, Varvel since 2004 started an ongoing support programme with three non-profit institutions: UNICEF (United Nations Children's Fund), MSF (Médecins sans Frontières) and ANT (National Cancer Association). Environmental respect and protection are also part of Varvel's values and this is why Varvel certified in 2001 its Environmental System to standard UNI EN ISO 14001.
